2004 International Telecommunications Data

March 2006

Introduction

This is the Federal Communications Commission's (FCC's) annual compilation regarding telecommunications service between the United States and international points. The data compiled in this report are for the year 2004. The data are compiled from reports submitted to the FCC by U.S. carriers pursuant to Section 43.61 of the Commission's rules.¹ Section 43.61(a) directs carriers to file reports by July 31 that summarize international telecommunications service provided during the preceding calendar year. Carriers submit their final data for the preceding calendar year by October 31. The specific filing requirements are set forth in the *Manual for Filing Section 43.61 Data* (June 1995).

Statistical Findings

- U.S. billed minutes increased 32.5% from 48.0 billion in 2003 to 63.6 billion in 2004.
- In 2004, seventy-two U.S. facilities-based and facilities-resale (see definitions on page 3) carriers reported that they billed \$8.7 billion for international telephone service, \$458 million for private line services, and \$136 million for other miscellaneous international services, compared to \$8.9 billion, \$620 million, and \$156 million, respectively, in 2003.
- U.S. carrier's net settlement payments – the amount paid to foreign carriers to compensate those carriers for completing calls – increased from \$3.1 billion in 2003 to \$3.6 billion in 2004.
- Retained revenues – revenues billed by U.S. carriers, less settlement amounts owed to foreign carriers for U.S. billed traffic, plus settlement amounts due to U.S. carriers for foreign-billed traffic – decreased 13.6% from \$6.6 billion in 2003 to \$5.7 billion in 2004.
- Pure resale providers resell the services of underlying U.S. facilities-based and facilities-resale carriers. The number of reporting carriers grew from 776 in 2003 to 794 in 2004. Pure resale minutes grew from 36.1 billion in 2003 to 38.5 billion in 2004. Billed revenues decreased from \$5.8 billion in 2003 to \$5.2 billion in 2004.

Table 1 summarizes the traffic and revenue data reported by all U.S. facilities-based and facilities-resale carriers for 2004, but does not include pure resale service. These categories are explained below.

¹ 47 C.F.R. § 43.61. The Commission, in April 2004, proposed modifications to the Sections 43.61 and 43.82 international data collection rules. See *Reporting Requirements for U.S. Providers of International Telecommunications Services; Amendment of Part 43 of the Commission's Rules*, IB Docket 04-112, Notice of Proposed Rulemaking, 19 FCC Rcd 6460 (2004) ("International Reporting Requirements Reform NPRM").

Table 1. International Telecommunications Revenues, 2004

	Traffic*	Revenues Billed by U.S. Carriers (millions)	Net Settlements with Foreign Carriers (millions)	Net Retained Revenues** (millions)
Message Telephone (millions of minutes)	82,061	\$8,663	(\$3,642)	\$5,022
Private Line (number of circuits)	19,383	458	None	458
International Other Miscellaneous***	Not meaningful	136	(5)	131
Total****	Not meaningful	\$9,351	(\$3,647)	\$5,704

* Traffic measures for international message telephone and other miscellaneous service include both U.S. billed traffic and foreign billed traffic that terminates in the United States, but excludes most traffic that transits the United States.

** Net U.S. carrier retained revenues equal billed revenues plus settlement amounts receivable from foreign carriers less amounts due to foreign carriers. See Table 3, below. Detail may not match totals because of necessary rounding.

*** Currently, carriers report frame relay/ATM, packet switching, virtual private line, occasional television, and VOIP services as other miscellaneous international services. That information can be found in Section C (International Miscellaneous Services, Page 1) of this report.

**** Total above includes \$407 million billed revenues, \$221 million net settlements, and \$187 million net revenues for eighteen facilities-based and facilities-resale carriers requesting confidential treatment in the above categories.

Definitions

International services are provided either on a facilities-based, facilities-resale, or pure resale basis. For categorizing traffic, **facilities-based** traffic refers to services provided using international transmission facilities owned in whole or in part by the carrier providing the service. Facilities-based carriers use one or more international channels of communication to provide international telecommunications service. An international channel is a wire or radio link that facilitates electronic communications between a U.S. point and a point outside the domestic United States (see Table 4, below). A facilities-based carrier is “a carrier that holds an ownership, indefeasible-right-of-user, or leasehold interest in bare capacity in the U.S. end of an international facility, regardless of whether the underlying facility is a common carrier or non-common carrier submarine cable or a satellite system.” See 47 C.F.R. § 63.09(a). For categorizing traffic, **facilities-resale** traffic refers to services provided by a carrier utilizing international circuits leased from other reporting international carriers. The determination as to whether international private line services are reported as facilities-based or facilities-resale generally is based on the first international link of a circuit. If the carrier has an ownership interest in that link, or leases it from an entity that does not report that link, then service provided over that circuit will be reported as facilities-based. Otherwise, the international private line service should be reported as facilities-resale.

Carriers provide **pure resale** services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic, and report the traffic on a country-by-country basis in their own Section 43.61 reports. Table 2 shows that there are reduced reporting requirements for services provided on a pure resale basis. Some carriers report traffic carried over circuits that they own and those that they lease from other carriers, as well as traffic that they handle on a pure resale basis (i.e., by reselling the switched services of underlying carriers). These carriers report detailed data for traffic that they carry over owned and resold circuits and summary data for switched traffic that they route to other U.S. carriers. Section D of this report has information on pure resale services. In 2004, 794 carriers reported that they provided international message telephone service on a pure resale basis. These pure resale providers billed customers \$5.2 billion for 38.5 billion minutes. Twenty of these pure resale providers also reported international facilities-based and facilities-resale services.

Starting with the 1991 data filings, the Commission required carriers to file facilities-based traffic separately from pure resale traffic. Facilities-resale traffic was not separated from facilities-based traffic. Beginning with the 1995 data filings, the Commission required carriers to provide separate switched service and private line data for facilities-based and facilities-resale services. At that time, a few carriers were offering international simple resale (ISR) services², which at that time consisted of telephone services provided over resold private lines, i.e., on a facilities-resale basis. The Commission subsequently allowed carriers to provide ISR services using owned circuits as well as resold circuits. Beginning with the 1997 data filings, the Commission required carriers to

² The Commission eliminated its ISR policy in the 2004 *International Settlements Policy Reform Order*. See *International Settlements Policy Reform, International Settlement Rates*, IB Docket No. 02-234, First Report and Order, 19 FCC Rcd 5709, 5723-25, paras. 26-31 (2004) (“2004 *International Settlements Policy Reform Order*”).

separate switched services data by the settlement arrangements made with carriers in foreign countries for terminating that traffic. Carriers now classify switched service traffic as traditional settlement with proportionate return or as non-traditional settlement, including traffic hubbed through an intermediate foreign country (see definitions on page 5).³ Carriers continue to report facilities-based and facilities-resale private line services separately.

Carriers must report switched traffic in three broad categories: U.S. billed; foreign billed; and transiting. **U.S. billed** traffic includes all traffic billed by U.S. carriers, and includes most calls that originate in the United States, calls that are placed collect or "caller toll-free" to the United States, U.S. carrier "country-direct" and "country-beyond" calls, and U.S. carrier reorigination traffic.

Country-direct and **country-beyond services** are U.S. carrier offerings that allow customers in foreign locations to route calls through U.S. carrier facilities to reach the United States (country-direct) or any world point (country-beyond). Country-direct and country-beyond services rely on alternative billing arrangements, such as credit cards, and enable the customer at a foreign point to be served by a U.S. carrier rather than by a foreign carrier. Note that U.S. carriers or their affiliates may operate in many foreign countries as foreign carriers. They do not report section 43.61 traffic on calls that they carry from one foreign country to another unless they carry this traffic through a U.S. point.

Reorigination traffic is traffic of a foreign carrier that transits a U.S. carrier's facilities and terminates with another carrier in a foreign point. The carrier terminating the traffic in the foreign point views the traffic as U.S. traffic. Reorigination allows the originating foreign carrier to take advantage of the U.S. carrier's accounting rate agreement with the carrier in the terminating country. The U.S. carrier treats reorigination traffic like U.S. billed traffic when it settles with the carrier in the country of termination, and it reports this traffic as U.S. billed traffic for filing purposes.

In their public filings, carriers include country-direct, country-beyond and reorigination traffic with other U.S. billed traffic. In proprietary filings, carriers separate these services from other U.S. billed traffic. Table A1 shows that carriers reported 63.6 billion minutes of U.S. billed traffic in 2004, for which they billed \$8.7 billion. Table A34 shows that 55.2 billion of these minutes and \$7.2 billion of this revenue were for calls that originated in the United States or terminated collect or caller toll-free in the United States. Table A35 shows that 1.4 billion of these minutes and \$0.7 billion of this revenue was for country-direct and country-beyond type services. Table A36 shows that 6.9 billion of these minutes and \$0.7 billion of this revenue was for reorigination services billed to foreign carriers.

Foreign billed traffic is all traffic billed by a foreign or correspondent carrier and includes most calls that originate at foreign points as well as collect and caller toll free calls placed by U.S. customers to foreign points. Foreign billed calls do not necessarily originate in the country for which the traffic is reported. In some cases, foreign carriers reoriginate traffic for other foreign

³ See *Annual Section 43.61(a) International Telecommunications Traffic Reports Due by August 1, 2005*, Public Notice, DA 05-1963 (Int'l Bur., rel. July 7, 2005).

carriers. U.S. carriers may not know which calls are reoriginated.

Transiting traffic is traffic of a foreign carrier that transits a U.S. carrier's facilities and terminates with another carrier in a foreign point. Unlike reorigination traffic, transiting traffic is settled based on the settlement rate between the actual countries of origination and destination. Transiting traffic is billed by the originating foreign carrier and settlement payments are reported by U.S. carriers for the country in which the service is billed. Where there are so-called "cascade billing arrangements," U.S. carriers report both settlement receipts and settlement payments for transiting calls. In a cascade billing arrangement, the U.S. carrier collects from the originating foreign carrier both a transit fee and the settlement amount that the originating foreign carrier will owe to the terminating foreign carrier. The U.S. carrier then makes the settlement payment to the terminating foreign carrier.

As explained above, carriers separately report international switched telephone, telegraph, telex, and miscellaneous services based on the financial termination arrangements. **Traditional Settlement** traffic is settled according to the Commission's International Settlements Policy (ISP).⁴ The settlement is based on the accounting rate, which is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route. The ISP requires nondiscriminatory accounting rates among U.S. carriers on a given route and that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. The ISP also requires that the U.S. carrier agree to accept no more than its proportionate share of return traffic from the foreign carrier. Table A32 shows that U.S. carriers reported 25.3 billion minutes of U.S. billed traditional settlement traffic in 2004, for which they billed \$2.9 billion.

Non-Traditional traffic is switched traffic that is routed and settled by the U.S. carrier outside of the traditional settlement process. Table A33 shows that U.S. carriers reported 38.3 billion U.S. billed non-traditional minutes of traffic in year 2004, for which they billed \$5.8 billion. U.S. carriers also reported receiving 10.0 billion foreign billed non-traditional minutes of traffic in year 2004. These tables may understate the total amount of traffic settled under non-traditional arrangements. It appears that carriers continued to report for year 2004 substantial amounts of non-traditional settlement traffic as traditional settlement traffic.⁵

⁴ See 47 C.F.R. §§ 43.51(e), 64.1001 (2003). In 2004, the Commission revised its policy and rules to remove the ISP from all routes on which carriers have negotiated benchmark-compliant rates. *2004 International Settlements Policy Reform Order*, 19 FCC Rcd at 5723-24, paras. 27-28. Consequently, 163 routes were exempted from the ISP in 2004. See Public Notice, 19 FCC Rcd 24056 (2004).

⁵ For example, while carriers reported 3.6 billion minutes of non-traditional settlement traffic for Canada, and 1.7 billion minutes for the United Kingdom, they also reported 1.8 billion minutes of traditional settlement traffic for each country. The Commission has permitted non-traditional settlement arrangements for U.S.-Canada and U.S.-U.K. traffic since 1992 and 1994, respectively. It is therefore unlikely that carriers are in fact settling substantial amounts of traffic on these two U.S. international routes under traditional settlement arrangements.

Reporting Requirements

Different levels of reporting are used for different categories of service. Table 2 shows that carriers must report traffic and revenues on a country-by-country basis for the most commonly used communications services.

Table 2. International Telecommunications Reporting Requirements

Service	Level of reporting for traffic and revenues for larger U.S. points *	Traffic Measures
Traffic exchanged with foreign carriers under Traditional Settlement, and Non-Traditional Settlement (Includes service provided over owned and resold circuits.) Switched Services Message Telephone Service Miscellaneous and Other International Services ***** Message Telegraph Service Teleprinter Exchange (Telex) Service Occasional Use Television Packet Switching Switched Video	Country-by-country Region and world totals Region and world totals Region and world totals Region and world totals Region and world totals	Messages** and minutes*** Messages** and words Messages** and minutes Hours Kilo Segments Sessions and minutes
Facilities-Based and Facilities-Resale Services Private Line Services	Country-by-country	Circuits at year-end, 64-kilobit equivalent circuits at year-end, revenues for the entire year
Pure Resale Services (resale of underlying carrier switched services)	World totals	Minutes

See notes to Table 2 below.

**Table 2. International Telecommunications Reporting Requirements --
Continued**

Notes:

- * Carriers may file world totals in lieu of country-by-country data for the smaller U.S. points identified in Table 4.
- ** Carriers are not required to file message counts for transiting traffic.
- *** Many carriers have requested proprietary treatment for country-by-country transiting minutes. Both U.S. and foreign carriers compete for transiting traffic. The minutes data would allow competitors to estimate contract revenues per minute. The published tables therefore contain region and world totals for transiting minutes.
- **** Prior to filing 1995 data, carriers selected their own traffic measures for miscellaneous services.

For private line services, carriers report the number of actual circuits leased to customers at year-end. Beginning with their 1995 international traffic data, carriers also report these circuits in terms of voice-equivalent circuits. For lower bandwidths, this means reporting the number of 64-kilobit-per-second channels that would equal the actual circuits. An 18 megahertz video channel, however, should be reported as 240 voice-equivalent channels; a 24-megahertz video channel should be reported as 288 voice-equivalent channels; and a 36-megahertz video channel should be reported as 630 voice-equivalent channels. This is the same conversion factor used by carriers in preparing circuit data reports filed pursuant to Section 43.82 of the Commission's rules, and to calculate regulatory fees. Voice-equivalent circuits are denoted "64 K" in the attached tables.

Facilities-based U.S. and foreign carriers jointly provide most international services. This is not always apparent to the customer, but is reflected in some of the traffic and revenue data that are filed. For switched services, one carrier collects from customers and then compensates its foreign partners through the settlement process. Compensation is based on minutes of calling and on accounting rates specified in settlement agreements. The number of minutes used for settlement purposes is generally based on the number of conversation minutes. In many cases, accumulated seconds are used to determine the minutes used in settlements. In the case of Mexico, billed minutes are used to determine settlements. Carriers providing international simple resale and hubbed services may have settlement-like arrangements under which U.S. carriers and PTTs compensate each other for traffic that originates or terminates at foreign points. For facilities-based and facilities-resale services, carriers must report the minutes used for settlement purposes.⁶ Pure resale carriers file billed minutes, since they do not

⁶ Prior to 1991, the Commission directed carriers to report billed minutes, rather than settlement minutes. Billed minutes tend to be greater than settlement minutes because some carriers bill in

participate in the settlement process, and may not have access to settlement minutes data.

Country-beyond calls have two international legs. Carriers are instructed to report both the originating and terminating legs of such calls. Consequently, approximately two minutes will be reported for each conversation minute. Each leg of the call may have settlement payments and these payments should be reported for the appropriate country. Carriers are instructed to report all billed revenues by the country in which the call originates. Country-direct and country-beyond traffic are treated confidentially and are not identified separately from a carrier's publicly filed data.

For U.S. billed switched services, the tables show the amount that the customers are billed for service, the corresponding settlement amount that the carrier owes to its foreign partner, and the amount of revenues that it retains. Carriers are instructed to report the actual amount of revenues that they bill for service, net of discounts. Many carriers offer discount plans that entitle customers to discounts based on the customer's total bill. Some carriers do not recalculate discounted bill amounts on a call-by-call basis. These carriers collect country-by-country revenue totals based on non-discounted rates and must estimate the amount of discounts for each country.

For foreign billed traffic, the tables show the settlement amounts owed to U.S. carriers by foreign carriers. The tables refer to these amounts as "Receipts from Foreign Carriers." In the case of transiting traffic, the U.S. carrier often receives a transit fee for itself, and a settlement amount which is owed to the terminating carrier. Thus, the tables show receipts, payouts and a net amount for transiting traffic. Table 3 shows the revenue relationships.

Table 3. International Telecommunications Revenue Relationships

U.S. Billed Traffic	Billed revenues <u>- Settlements owed to foreign carriers</u> = U.S. carrier retained revenues
Foreign Billed Traffic	Settlements due from foreign carriers = U.S. carrier retained revenues
Transiting Traffic	Transit fee and settlements due from foreign carriers <u>- Settlements owed to foreign carriers</u> = U.S. carrier retained revenues
Total	Retained revenues for U.S. billed + Retained revenues from foreign billed <u>+ Retained revenues from transiting</u> = Total U.S. carrier retained revenues

30-second increments.

U.S. carriers report the number of private line circuits actually leased at year-end. Financial arrangements for private line services are different than for public switched services. Unlike message telephone service, where the rate charged to consumers covers the whole cost of the call, the U.S. carrier's private line rate covers only the half-circuit to the theoretical mid-point. In some cases, each carrier bills for its half of the service; in other cases, one carrier acts as the collection agent. The FCC filing manual states that U.S. carriers must report the amount of private line revenues that they record for their half of the service, regardless of who actually collects the revenues.⁷ U.S. carriers should not report revenues that they collect on behalf of the foreign carriers or amounts that they bill for services that they provide in foreign countries.

International points are grouped into ten regions for reporting purposes. The regions include all countries of the world as well as three maritime classifications -- the Atlantic, Pacific, and other oceans. In some cases, international points have been grouped outside the geographic region for reporting purposes. For example, the Azores and Madeira Islands are included with Portugal. Any data reported to these points are included with Portugal traffic and are summarized with Western Europe traffic in the tables. (See *International Points Used for FCC Reporting Purposes*, April 1994.)

Carriers are required to file separate data for each U.S. point that they serve. Alaska and Hawaii, for example, are considered distinct U.S. points for this purpose. Table 4 identifies the U.S. points used for reporting purposes. Carriers serving larger U.S. points are required to file detailed country-by-country data on computer disk. Carriers serving smaller U.S. points may file world totals in lieu of country-by-country data. In a few instances, carriers have obtained waivers so that they can consolidate data for Hawaii and the conterminous United States.⁸

⁷ *Manual for Filing Section 43.61 Data*, June 1995, available from the FCC's Internet site at <http://www.fcc.gov/ib>, under "Industry Information," click "*Section 43.61 International Traffic Data*."

⁸ The conterminous United States consists of data from the 48 contiguous states and the District of Columbia.

Table 4. Reporting Requirements for Facilities-Based and Facilities-Resale Services

Larger U.S. points for which carriers file country-by-country data	Smaller U.S. points for which carriers file world total data
<u>Domestic U.S. points</u> Alaska Conterminous U.S. Hawaii Puerto Rico	American Samoa Baker Island Howland Island Jarvis Island Johnston Atoll Kingman Reef Midway Atoll Navassa Island Northern Mariana Islands Palmyra Atoll Wake Island
<u>Other U.S. points</u> Guam U.S. Virgin Islands	

Table 4 shows which U.S. points are classified as **domestic** and which are classified as **other**. Calls between domestic U.S. points are considered domestic and therefore are not reported. Calls between domestic U.S. points and other U.S. points are defined as international and are reported. For example, a directly dialed call originating in Guam and terminating in Hawaii is reported by the carrier serving Guam as U.S. billed traffic to Hawaii. Note that the carrier serving Hawaii reports this same call as a foreign billed call from Guam.⁹

Presentation of Data

Table 5 lists the carriers whose data are presented in the attached tables. Table 6 summarizes the billed revenue data contained in the tables, and Table 7 summarizes the net revenue data contained in the tables (billed revenues net of settlement payments). Table 8 summarizes international message telephone service for the three largest carriers (AT&T, MCI, Inc., and Sprint) for 1994 through 2004.

The Section 43.61 data have been summarized for all reporting carriers and for all U.S. points. Some tables show totals for all carriers serving individual U.S. points. Other tables show totals for all data filed by individual carriers. Data have been consolidated where a holding company owns more than one carrier. For example, the data Orbitel S.A. E.S.P. reported for its

⁹ Thus, our aggregate call statistics double-count both the call and the associated minutes. Table A1 shows that U.S. carriers reported 10.9 billion calls between the U.S. and international points. Of these calls, 51million (less than 1%) were reported for traffic between U.S. points. Thus, the double-counting is small when compared to the overall number of calls. The International Reporting Requirements Reform NPRM proposes to eliminate the requirement that carriers report traffic between U.S. points. See footnote 1 above.

subsidiary, Cinco Telecom Corporation, have been consolidated and included with other Orbitel S.A. E.S.P. data. The country-by-country data are presented by region of the world. The foreign points are listed alphabetically in each region.

U.S. carriers are required to file message and minute counts for switched services that originate or terminate at a U.S. point. They are required to provide only minutes for traffic that transits U.S. points, though, because U.S. carriers sometimes have difficulty obtaining message counts for traffic billed by foreign telephone companies. As noted in Table 2, transiting minutes are not published on a country-by-country basis. Region totals are provided for those regions where transiting traffic is carried from more than one country.

Carriers file detailed traffic data using a record format contained in the filing manual. For switched services, each record contains a billing type code that signifies the traffic exchange method (*e.g.*, traditional settlement vs. non-traditional settlement) and whether the call was U.S. billed, foreign billed, or transiting. For U.S. billed calls, the billing type code indicates whether the data represents (a) U.S.- originated traffic and U.S.-terminated collect and subscriber toll free traffic; (b) country-direct and country-beyond traffic; or (c) U.S. carrier reorigination traffic. For international private line services, the billing type code signifies whether the data contain facilities-based or facilities-resale circuits. The billing codes used for filing year 2004 data are contained in the International Bureau's Public Notice DA 05-1963, *Annual Section 43.61(a) International Telecommunications Traffic Reports Due by August 1, 2005*, released July 7, 2005.

The table titles use the billing types to indicate the type of data aggregated in a particular table. There are three groups of billing type codes for switched services. Billing types 1 through 6 are used for traditional settlement traffic. Billing types 11 through 16 are used for non-traditional settlement traffic. The billing types do not distinguish whether a switched service was provided over a carrier's owned facilities or over leased circuits.

The specific billing types allow the following breakdowns.

<u>Billing Type(s)</u>	
1, 11	U.S. billed calls that originate in, or terminate collect or subscriber toll-free in, the United States
2, 12	foreign billed calls
3	traditional transiting calls (there is no billing type 13 because all traditional transiting calls are exchanged under traditional settlement arrangements)
4, 14	U.S. billed country-direct and country-beyond calls
5, 15	terminating leg of calls reoriginated by U.S. carriers and terminated via facilities-based or facilities-resale circuits
35	terminating leg of calls reoriginated by U.S. carriers and terminated via pure resale of another carrier's switched services
6, 16	originating leg of calls reoriginated by U.S. carriers

There are only two billing type codes used for private line services. Billing type 1 signifies facilities-based circuits. Billing type 11 signifies facilities-resale circuits.

Trinity Communications LTD, Inc.
Universal Access, Inc.
WDT World Discount Telecommunications Co.
Western Telephone, Inc.

Traffic Arrangements: U.S. carriers use the following types of arrangements to govern the exchange of traffic between themselves and foreign carriers.

- 1/ Traditional Settlement & Proportionate Return - Traffic settled according to the Commission's International Settlements Policy (ISP). The ISP requires that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. An accounting rate is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route.
- 2/ Non-Traditional Settlement & Proportionate Return - Traffic settled outside the Commission's ISP.

The following companies' section 43.61(a) international telecommunications traffic reports were combined because of mergers, acquisitions, and changes in corporate structure:

- 3/ ABS-CBN Telecom North America, Inc. inadvertently submitted international message telephone pure resale services for prior calendar years.
- 4/ ACC Telecommunications LLC and ACC Telecommunications of Virginia stopped providing international services after March, 2004. ACC Telecommunications, LLC and ACC Telecommunications of Virginia, LLC are respectively included in Telcove Operations, Inc.'s and Telcove of Virginia, LLC's section 43.61(a) submissions for the period April - December, 2004.
- 5/ American Towers' subsidiary Verestar, Inc. filed for bankruptcy in New York on 12/23/2003. All of its assets were sold to SES Americom. Although Verestar, Inc. currently still exists, it does not provide any services to customers. All of its call signs were either relinquished or modified to non-common carrier status.
- 6/ Cincinnati Bell's subsidiary, BCSI, Inc. sold all of its customers in June, 2003, to CIII Communications, LLC. At that time, BCSI, Inc. stopped operating. CIII Communications, LLC changed its name to Broadwing Communications, LLC.
- 7/ Cingular Wireless LLC's year 2004 section 43.61(a) submission reflects the combined information on a pro forma basis for AT&T Wireless and Cingular Wireless.
- 8/ Comsat General Corporation's assets were purchased by Intelsat General Corporation on 11/29/04.
- 9/ Dobson's Communications Corporation's 2004 section 43.61(a) submission includes information for its wholly owned subsidiary, American Cellular Corporation.
- 10/ Easylink Services Corporation advises that it provides international enhanced services only and did not operate as a common carrier in 2004.
- 11/ Elephant Talk, Inc. ceased operations in May, 2003.
- 12/ Emergent, LLC and Stonebridge Communications, LLC year 2004 section 43.61(a) submissions were merged with New Access Communications, LLC.
- 13/ Focal Communications Corporation was purchased by Broadwing Communications, LLC in September, 2004. Focal's year 2004 section 43.61(a) information is included in Broadwing Communications, LLC's submission.
- 14/ GBnet Corporation ("GBnet BVI") was organized under the laws of the British Virgin Islands. It was acquired by Comsat International in June, 2004.
- 15/ Geocomm Corporation's section 43.61(a) submission for year 2004 is for January, 2004 through May, 2004. The carrier ceased its international operations as of May, 2004 and is currently in the process of closing down its business.

Addendum to Table 5 -- Continued

- 16/ GNG Networks America, Inc. discontinued international pure resale services after year 2003.
- 17/ Hanaro Telecom America ceased its operation as of December 31, 2004 and no longer has offices in the United States.
- 18/ Medley International Teleport, Inc. ceased operations after year 2003.
- 19/ Melbourne Teleport, Inc. ceased operations after year 2003.
- 20/ MG, LLC d/b/a Searsconnect did not provide any international service in year 2004.
- 21/ Nevadacom filed for Chapter 7 bankruptcy protection in Nevada on April 16, 2005.
- 22/ NuVox, Inc.'s year 2004 submission includes NuVox Communications, Inc. and NewSouth Communications Corp.
- 23/ ONSenet America discontinued facilities-based/facilities resale international services after year 2003.
- 24/ Operator Service Company (OSC) did not provide any international services in year 2004.
- 25/ Pinnacles Long Distance discontinued providing services after calendar year 2003.
- 26/ Qwest's subsidiary, USLD Communications, Inc.'s international activities and revenues were moved into and are being reported as part of Qwest Communications Corporation.
- 27/ Schaller Telephone Company filed a 2003 section 43.61(a) in error. It does not provide international services. The company's subsidiary, Advanced Network Communications filed a section 43.61(a) report for year 2004.
- 28/ SMITCOMS, Inc. commenced services in January, 2005. Therefore, the carrier is not due to file a complete section 43.61(a) until July, 2006.
- 29/ Telia Sonera AB's subsidiary, Sonera Corporation, stopped providing service around July 2003, and is currently basically dormant.
- 30/ The Long Distance Partnership, L.P. did not provide any billable international services in calendar years 2004 or 2005.

The following companies either changed their name or filed a report name different from the previous years:

- 31/ Adelphia Business Solutions, due to emergence from bankruptcy, on April 4, 2005, changed its name to Telcove, Inc. Its subsidiary, PECO Hyperion Telecommunications, changed its name to Telcove of Eastern Pennsylvania.
- 32/ CIII Communications, LLC changed its name to Broadwing Communications, LLC.
- 33/ Choicetel, LLC filed its year 2004 section 43.61(a) as Choicetel Communications LLC.
- 34/ Communications Telecom Services of Fort Bend Company filed its year 2004 section 43.61(a) as Consolidated Communications Network Services Company.
- 35/ DataAccess Ltd. filed their 2004 section 43.61(a) submission as DataAccess America, Inc.
- 36/ Gervais Telephone Company d/b/a DataVision Communications filed its year 2004 section 43.61(a) submission as Gervais Telephone Company.
- 37/ Infone LLC was formerly known as North by NortheastCom, LLC.
- 38/ Insight Phone of Kentucky was formerly known as AT&T Broadband Phone of Kentucky. Insight Phone of Indiana, LLC was formerly known as AT&T Broadband Phone of Indiana, LLC.
- 39/ Northeast Telecom, Inc. d/b/a Northeast LD filed its year 2004 submission as Northeast Long Distance, LLC.
- 40/ Partner Communications, LLC filed its year 2004 report as Connecticut Broadband, LLC.
- 41/ Price County Info. Sys., Inc. d/b/a Price County Telcom filed its year 2004 section 43.61(a) as Price County Information Systems, LLC.
- 42/ Telecom Italia of North America Inc., changed its name to Telecom Italia Sparkle of North America, Inc. in August, 2004.
- 43/ Toledo Area Telecommunications Services, Inc. d/b/a Buckeye Telesystem filed its year 2004 section 43.61(a) as Buckeye Telesystem, Inc.
- 44/ Totah Communications, Inc. was formerly Totah Telephone Company, Inc.
- 45/ Trinsic Communications, Inc. was formerly Z-Tel Communications, Inc.
- 46/ US Link, Inc. filed its year 2004 section 43.61(a) as US Link, Inc. d/b/a TDS Metrocom.
- 47/ WestCom LLC d/b/a WesTelFiber was formerly known as Digital Easy Chair.
- 48/ Yell County Telephone Company, in May, 2005, changed its name to Arkwest Communications, Inc.

The following companies requested confidential treatment pertaining to their calendar year 2004 section 43.61(a) submission:

* Total for 2003 and 2004 include information for carriers requesting confidential treatment

Addendum to Table 8

Note: Some previously published data have been revised.

- 1/ Data exclude pure resale traffic unless otherwise noted.
- 2/ Retained revenues shown for service that originates or terminates in the United States. These figures exclude revenues for calls that transit the United States. Retained revenues are calculated as revenues billed by U.S. carriers, less settlement amounts owed to foreign carriers for U.S. billed traffic, plus settlement amounts due to U.S. carriers for foreign-billed traffic.

2004 Annual Section 43.61 International Traffic Data for All U.S. Points: All Settlement Arrangements

Table A1: All United States Carriers

Message Telephone Service

Billing Types Covered: 1, 2, 3, 4, 5, 11, 12, 14, 15

2004 Section 43.61 International Traffic Data
Traffic Measures Used For Miscellaneous Service Tables *

Company / Service **	Traffic Measure #1	Traffic Measure #2
Facilities-Based and Facilities-Resale Providers of Miscellaneous Services		
Cinergy VOIP Services	Messages	Minutes
France Telecom Virtual Private Line	Leases	Voice Equivalent Circuits
Sprint Frame Relay/ATM Packet Switching	Circuits Kilo Segments	64 KBPS Hours
UniPlex Telecom Technologies, Inc. VOIP Services	Messages	Minutes
WilTel Communications, LLC Occasional Television	Hours	

* Traffic measures are specified in the Manual for Filing Section 43.61 Data, June 1995.

** In 2004, recognizing the de minimis nature of associated revenues and burden to file, the Commission granted MCI's request not to report its other miscellaneous international telex and telegraph services. The Commission, however, did require the carrier to retain the data for telex and telegraph services for two years from the date of the Commission's response to the carrier's waiver request (*i.e.*, until August 5, 2007). Other carriers that previously reported providing telex or telegraph service explained that they had either sold or discontinued their international telex and telegraph operations. As a result, there are no data reported on a facilities-based/facilities-resale basis for other miscellaneous international telex and telegraph services in year 2004.

Note: Carriers provide pure resale services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic and report the traffic on a country-by-country basis. Reporting underlying U.S. carriers' country-by-country data are available in Section A: Switched Services Telephone of this annual publication, International Telecommunications Data.
